Some projects are not located at a single address, and therefore could be attributable to multiple legislative districts. For projects that physically cross multiple legislative districts (e.g., transit projects), the entire project funding and other benefits are attributed to all relevant districts. For projects that report at the census tract level (e.g., vouchers, rebates, and household installations), the entire project funding and other benefits are attributed to a single district, determined by which district includes the majority of the census tract.

In September 2016, the Legislature passed AB 1550 (Gomez, Chapter 369, Statutes of 2016), which requires the 2019 Investment Plan to include new investment allocations for disadvantaged communities, and low-income communities and households. In 2017, CARB released guidance to help administering agencies direct funding consistent with these new allocations. Future reports will include AB 1550 outcomes as agencies implement more funding.

savings

Some projects are not located at a single address, and therefore could be attributable to multiple legislative districts. For projects that physically cross multiple legislative districts (e.g., transit projects), the entire project funding and other benefits are attributed to all relevant districts. For projects that report at the census tract level (e.g., vouchers, rebates, and household installations), the entire project funding and other benefits are attributed to a single district, determined by which district includes the majority of the census tract.

In September 2016, the Legislature passed AB 1550 (Gomez, Chapter 369, Statutes of 2016), which requires the 2019 Investment Plan to include new investment allocations for disadvantaged communities, and low-income communities and households. In 2017, CARB released guidance to help administering agencies direct funding consistent with these new allocations. Future reports will include AB 1550 outcomes as agencies implement more funding.
